Step 1 — Rear Case

- Remove these two 3mm screws using a PH00 Screwdriver

Step 2

- Use the blue plastic opening tool to gently pry the back case off

Step 3 — Battery

- Disconnect the wires that connect the battery to the motherboard using the spudger.

Step 4

- Slide the spudger underneath the battery and gently lift it off of the adhesive.

Step 5

- Place the new battery in the same location and connect the wires the same way as the previous battery.

To reassemble your device, follow these instructions in reverse order.
